

Central Bank of Bangladesh installed with the First Wireless DCN System in Bangladesh

BOSCH

Invented for life

Industry:

Banking and Finance / Commercial Banks

End User:

Central Bank of Bangladesh

The Central Bank of Bangladesh is the central bank and apex regulatory body for the country's monetary and financial system. At present, the bank has nine offices located in Motijheel, Sadarghat, Chittagong, Khulna, Bogra, Rajshahi, Sylhet, Barisal, and Rangpur; with a total manpower of 5,071 at the end of FY 2010. The bank performs all the core functions of a typical monetary and financial sector regulator and a number of other non-core functions.

Business Objective:

Numerous major meetings were held at the Central Bank of Bangladesh on a regular basis, and these meetings often involved top senior officials from all financial and banking institutions in Bangladesh. The boardroom is used to broadcast live and important financial news to the country. The bank therefore required a conference system with excellent sound quality and stable product reliability. Bosch wireless DCN conference system with integration of Bosch

Solution:

The Bosch wireless DCN conference system, together with Bosch CCTV solution was installed by Litme Enterprise, a Bosch partner in Bangladesh.

In total, there were 40 wireless delegates units and a chairman unit installed in their boardroom. This secured and digitally protected conference system acts as a wireless communication tool for the user during their conferences and meeting sessions.

The integration of Bosch high speed AutoDome PTZ cameras makes the automatic display of five video images showcasing speaking delegates on all wall monitors simultaneously, possible. Alternatively, the CCTV Allegiant matrix control switchers and KBD keyboard also allows the person in charge the flexibility of controlling and manoeuvring the camera manually, for accurate projection of images on the screens.

In addition, with the support of DIVAR Digital Video Recorder, all the conference and meeting sessions may be digitally recorded for future referencing and archiving.

Boardroom of the Central Bank of Bangladesh

The Bosch wireless DCN conference system with CCTV solution includes:

DCN-WCCU Wireless Central Control Unit	X 01
DCN-WAP Wireless Access Point	X 01
Wireless Delegates Units	X 40
LBB3443/10 Lightweight Headphones	X 45
AutoDome PTZ Camera System	X 04
Divar Digital Video Recorder 600 Series	X 01

Result:

The newly installed Bosch wireless DCN conference system and Bosch CCTV solution has ameliorated the situation and put the user in control since the system has fully satisfied all their previous requirements. The Central Bank of Bangladesh's conference and meeting sessions were carried out efficiently and effectively as participants were able to communicate effortlessly and ultimately, with ease.

Lastly, the Central Bank of Bangladesh is also proud to be the first organisation in Bangladesh to have installed a fully integrated wireless DCN conference system..
